ABSTRACT:

Our team is going to establish a website that provides informations related to Healthcare and Biomedical Services. First of all, a question arises what is Biomedical services ? **BIOMEDICAL SERVICES** provides support for all your biomedical equipment. Some examples of services are :-

- Anesthesia machine service and repair
- Service contract negotiation and management, etc.

On our website, we will provide the links of that sites which provide these services.

Now, we come to Healthcare. Firstly what is Healthcare ? **HEALTHCARE** is the maintenance or improvement of health by the prevention, diagnosis, treatment, recovery, etc in people. Through our website, we will provide the information related to diseases, their symptoms, precautions and the medicines which is effective in that diseases.

Currently, the whole world are facing with the most dangerous virus namely COVID-19. As we all know that the Coronavirus outbreak has been labelled a pandemic by the World Health Organisation (WHO).The Important thing is that yet, there is no vaccine of that. Through our website, we will provide the symptoms and precautions of that disease. We will provide the information related to the centres where the testing kit of that virus are available and moreover we will provide the helpline numbers given by the government.

The Technology stack used for the development of this website contains HTML, CSS and Java Script.

If we stay healthy, fit, having proper diet, we will be disease free.

STAY AT HOME AND STAY SAFE.
